

Enhanced Flexibility Fly when and where you want.

Your airplane leaves precisely at the time you choose. Your luggage arrives with you. Enroute, you are free to prepare for meetings, work or simply relax in the privacy and security of your own plane.

Nationally, private aircraft have access to approximately 5,500 airports, while commercial flights serve only about 500. With SkyShare® you eliminate layovers, commuter flights, and time-consuming car travel often needed to reach your final destination. You can fly directly to less congested and more conveniently located airports. And you can visit several cities in one day.

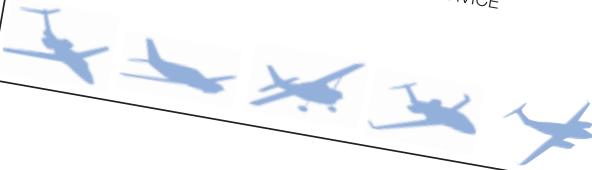

"You can make my
but you

A Smarter Way to Fly.

A New Alternative for Air Travelers

SkyShare for pleasure 2-Engine

It accommodates any...
or previously owned -
it and everything between.
Please an interest in the type
to meet your travel needs
that will be a pleasant surprise.

SkyShare allows you to accurately
project your annual flying budget
with NO cost overruns.

You can acquire a fraction of a more
expensive airplane - newer, bigger, faster and
better equipped. SkyShare provides you more
choice and greater value. And SkyShare is
not just for businesses. Pleasure pilots
who have always rented now
have the affordable option
of owning or leasing
a fractional share.

For more information about what SkyShare
can mean for you, call now or visit our website:
