

# "NOW, WE CONTROL OUR LOAN SYSTEM, INSTEAD OF IT CONTROLLING US."

"When we need a new or specialized consumer loan product, we need it now – not in the weeks or months it used to take to modify our software. We chose the Systematics Advanced Loan System (ALS) in addition to our other core applications from ALLTEL Information Services to give us the flexibility to

create or customize virtually any consumer loan product quickly – on-line and without programmer support.

"Originally, our conversion to a complete suite of Systematics applications had been scheduled to occur over a three-year period.

Through excellent project planning

and management and with help from ALLTEL Information Services software consultants, the conversion was completed in just 22 months, saving us \$1.5 million. We were very pleased."
