*"We wanted great software offering a data processing solution for the long-term growth needs of our bank.*

*"The exciting, new Systematics SAFE Software was created for the IBM AS/400™ technology. This unique new software takes full advantage of the native relational database capabilities of the AS/400.*

*"We also chose Systematics based on a proven record of total commitment and service exclusively to the banking industry. Systematics is the best data processing partner a bank can have.*

*"If we had to do it all over again we'd still choose Systematics. It was the right decision today and one that will last for years to come."*
