positions in certified medical schools in the United States, and all are licensed to practice medicine in one of the 50 states of the United States. All are certified by one or more medical boards that are a member of the American Board of Medical Specialties.

...who are prevention and empowerment.

We believe that the only reasonable path to health is by establishing strong partnerships between the patient (client) and the physician (provider). Most of our physicians are involved both in practice and teaching

...ation for emergency care.

Your company will provide information about how to call the Registered Nurse Advice Line at the same time they give you direction on how to register for eDocAmerica (generally during the employee benefit orientation at your company).

The service is easy, always available, and free with your eDocAmerica service.

When you call the service, you're given the choice of English or Spanish. A registered nurse will discuss your medical concern or problem, and then advise you on the recommended course of action, ranging from home care advice to a
